

ECONOMIC EMPOWERMENT THROUGH ARTIFICIAL INTELLIGENCE

GRAB BUDDY | REDEFINING MERCHANT EXPERIENCE, TRANSACTION BY TRANSACTION

Meet the Team

Team role delegations to ensure technical focus and cross-functional alignment.

Members	Roles	Scope of Work
Justin Yong Wenn Wei	Product Manager	- Defined the product scope and end-user flows. - Managed the AI features prioritization.
William Law Hong Waye	Technical Lead	- Led frontend development of the AI chatbot. - Managed the integration between the backend and frontend.
Joshua Edwin Rene Bonham	UI Designer	- Designed intuitive chat interface and visual information hierarchy. - Focused on accessibility for users with minimal digital fluency.
Alex Chee Kai Hong	AI Engineer	Developed LLM logic and contextual answer flow.

The Problem We're Solving

Businesses experience overwhelming reviews, struggling to identify what to fix or celebrate.

Key Challenges Experienced by Small Businesses

Data Comprehension

Operational Visibility

Unclear Feedback Loop

Key Questions Businesses Encounter

- How well is my business performing?
- What makes my business different?
- What are customers happy with?
- What could be improved on?

Grab Buddy - AI-Powered Insights for Everyday Merchants

A conversational AI assistant that transforms raw customer reviews into clear and actionable insights designed for store owners.

Without Grab Buddy	With Grab Buddy
Reading 100+ reviews manually.	Ask: "How am I doing this month?"
Unclear and difficult to identify patterns in reviews.	Instantly identify top praises and top concerns / complaints.
Unsure about what customers are thinking or experiencing.	Clear understanding with data-driven AI summaries.
Doesn't act on feedback, passive processing of reviews.	Proactive and clear improvement recommendations are provided.

AI Business Augmentation: Delivering Real-Time Customer Feedback for a Strategic Advantage.

Grab Buddy - Core Capabilities

An AI assistant that delivers business insights, automation, and localisation—all within a unified dashboard and chat interface.

Multilingual Support: *Supports English, Malay, and Chinese Inputs and Outputs to Enhance Accessibility*

Review Radar

- The LLM summarises customer reviews to identify patterns and provide benchmarking insights without exposing competitor identities.

Identify competitive gaps and replicate winning strategies to stay ahead.

Sales Pulse

- Visualises item sales frequency and revenue trends across daily, weekly, and monthly timeframes.

Make data-driven decisions to optimise sales and maximise profitability.

Shelf Sense

- The LLM uses function calling to retrieve product lists and support smarter inventory management.

Improve inventory management for smarter bundling and promotions.

Receipt Reader

- Converts printed receipts into structured, usable data through OCR-based transcription.

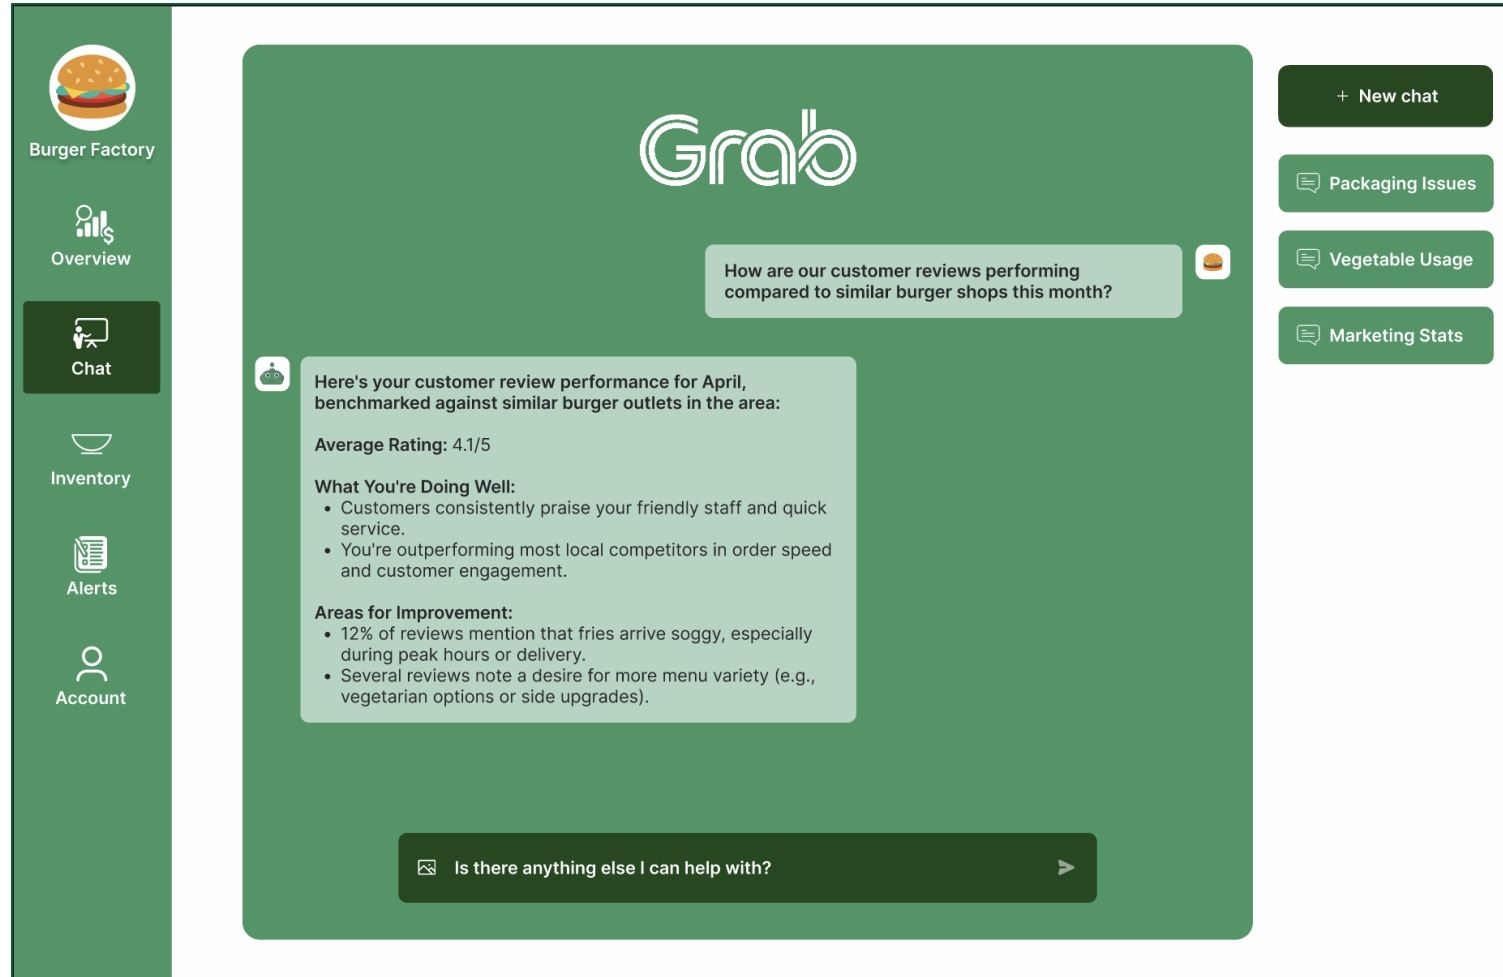

Eliminate manual data entry and accelerate reporting processes.

Legend:

1. LLM - Large Language Model
2. OCR - Optical Character Recognition

Grab Buddy - How It Works?

An AI Chatbot that turns the overwhelming customer reviews into simple and actionable insights.

What makes Grab Buddy special?

Conversational Interface

Design for ease of use, even in a face-face environment.

Accessible by All

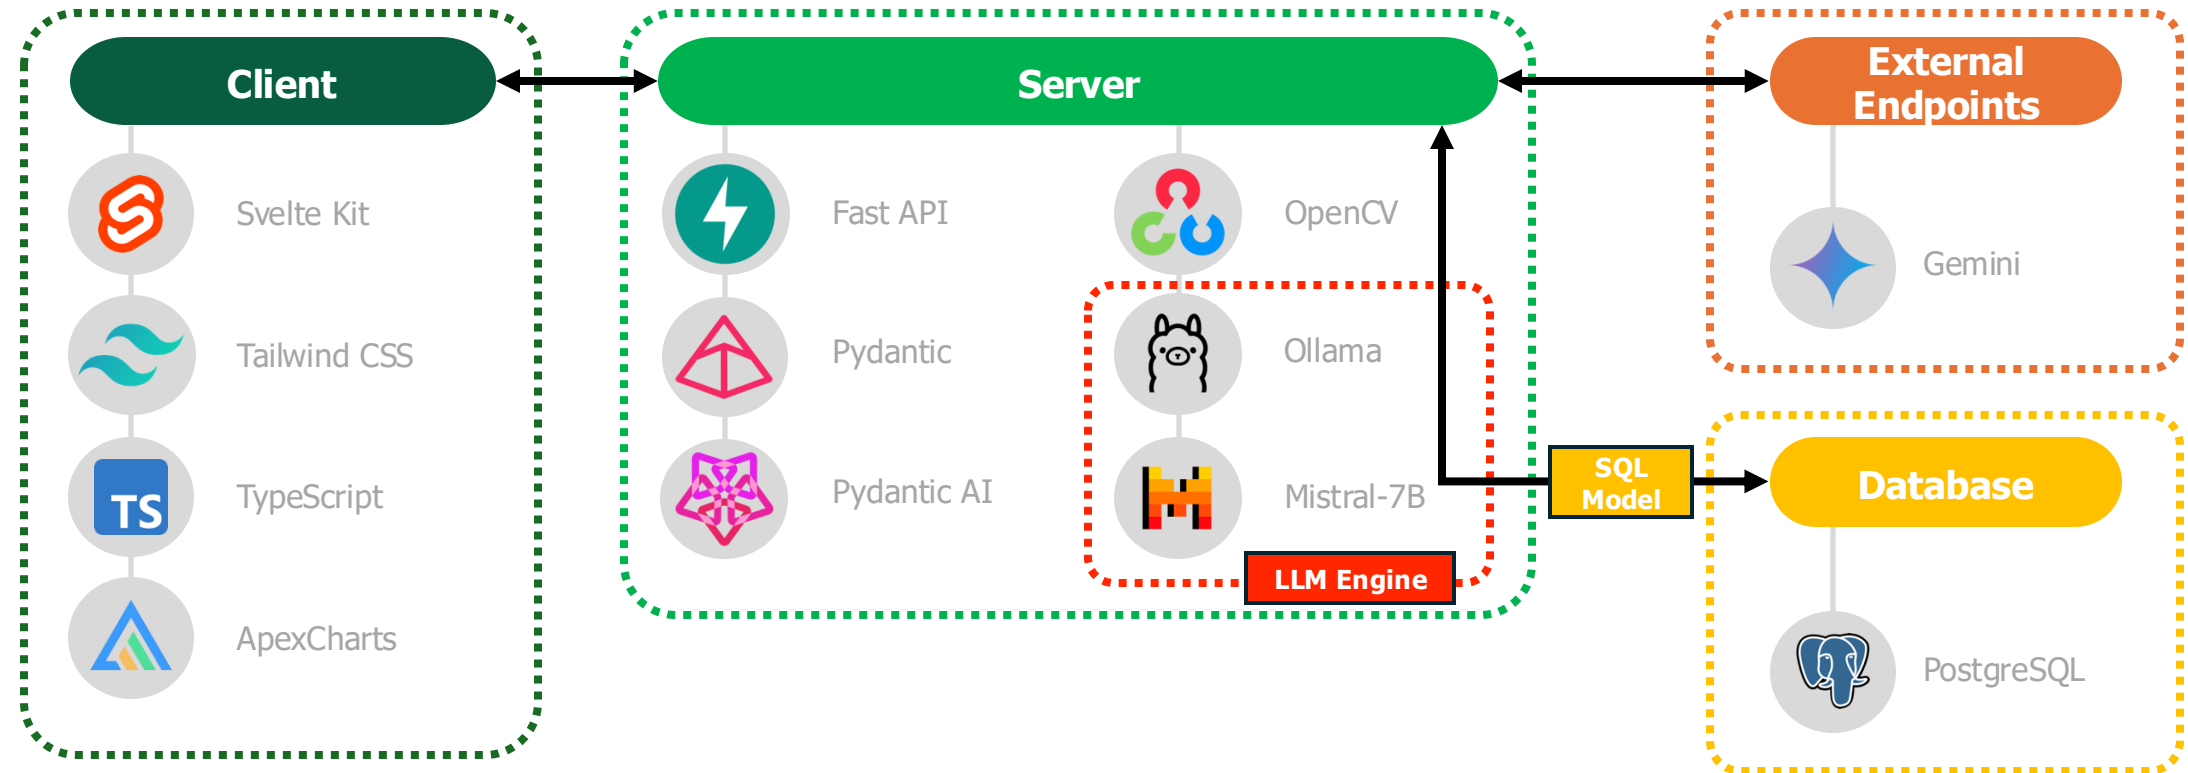

Simple and intuitive, tailored for in-store staff with minimal tech experience or fluency.

Actionable Insights

Provides insights that are clear, concise, and immediately accessible.

Grab Buddy - System Architecture

Modular, API-first architecture integrating LLMs, OCR, and multilingual NLP—built for scalability, speed, and real-time merchant usage.

Legend:

1. NLP - Natural Language Processing (Gemini will be handling the multilingual NLP Capabilities)

Enabling Smarter Decisions, Today and Tomorrow

Grab Buddy delivers immediate clarity through review and sales intelligence, with a scalable roadmap toward becoming a comprehensive assistant for merchants.
